The Ancient City Wall

Cycling on the City Wall

Our tour starts from the Bell tower, a building that has stood at the city centre for over 600 years. We will then head to the city wall where we will cycle around it whilst enjoying the view of the old city below. After the bike ride, we will depart from the south gate and take a stroll along the Shuyuanmen Street where there are lots of shops and stands selling traditional Chinese art works and art supplies such as calligraphy brushes, paper and ink. We will also visit a Buddhist temple which has a history of over 1800 years! The tour will finish where we started, at the Bell tower after eating lunch in a local restaurant.
